Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Barry. Barry discloses a captive screw comprising a ferrule (18); a screw having a head (21), shank (27), threads (26) and collar (25); and a spring (20). The screw is captured in the ferrule.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barry as applied to claim 1 above, and further in view of Aukzemas. Aukzemas discloses the particulars of the ferrule. Specifically, the ferrule is disclosed as having a knurled outer surface including a groove (32) and annular lip (generally at 30). At the time the invention was made, it would have been obvious for one of ordinary skill in the art to the exterior of the ferrule of Barry as disclosed in the Aukzemas in order to improve its attachment to the panel. The ring on the ferrule being bent is a produce-by-process

limitation wherein it is merely the final product considered for patentability. Barry shows a ring (22).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
